Austin, TX 78711

Re: Determination of ARARs for the
North Cavalcade Superfund Site

Dear Mr. Sorrells:

We have reviewed the information you have provided on the North Cavalcade Superfund Site. This information indicates that the creosote and pentachlorophenol wood treating operations previously conducted at the site were the source of the contamination presently encountered there.

The Railroad Commission of Texas has no jurisdiction over wood treating operations. Therefore, we have determined that we have no applicable or relevant and appropriate requirements for remedial actions at the North Cavalcade Superfund Site.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "Jerry Mullican", written over a horizontal line.

Jerry Mullican
Director of Underground
Injection Control
